PROFILE

Senior Full-Stack Software Engineer with 6 years of experience architecting and building scalable, secure, high-performance web applications for international clients. Deep expertise in JavaScript/TypeScript, NestJS, Next.js, and the MERN stack, with a strong focus on backend architecture, database design, and microservices. Significant experience delivering HIPAA-compliant healthcare platforms including HL7 FHIR-based data modelling and interoperability, and PHI-handling safeguards. Proven track record leading system migrations and mentoring engineering talent, while translating business requirements into robust technical solutions. Thrives in ownership-driven, collaborative environments delivering innovative software.

PROFESSIONAL EXPERIENCE

Senior Software Engineer – Full Stack Developer

Brackets Private Limited

Dec 2024 – Present

- Migrated 16 enterprise clients from v1 to v2 of a healthcare platform with zero data loss and minimal service disruption, owning the architecture and rollout plan end-to-end.
- Designed backend architecture and database schemas for a NestJS microservices system using AWS SNS/SQS as event brokers, supporting reliable communication across 7 services.
- Served as primary technical point of contact for multiple concurrent international clients, translating business requirements directly into delivery plans.
- Took ownership of major architectural decisions, designing backend architecture and database schemas to support scalable, maintainable systems.
- Partnered with the CTO to redesign sprint planning and GitHub workflows, and overall SDLC processes to enhance efficiency and team collaboration.
- Mentored 5 Full Stack interns under the CMIT program, with 3 of 5 converting to full-time engineering roles.

Executive Software Engineer – Full Stack Developer

Rendream

Jun 2024 – Dec 2024

- Built real-time features (Socket.io) and chunked S3 file upload pipelines supporting 5GB+ file handling, alongside MySQL data layer improvements
- Automated attendance-machine processing with a custom Python script, eliminating 9 - 10 hours/week of manual admin work.
- Translated product and design requirements into technical specs across 2 concurrent feature releases.

Software Engineer – Full Stack Developer

ZAPTA Technologies

Oct 2022 – Jun 2024

- Led architecture and database design for QuickSteps, a SaaS-based accounting and invoicing platform for SMBs, owning the system end-to-end from schema design through production deployment.
- Led 3 client projects across concurrent engagements, owning technical direction, code quality, and delivery timelines.
- Owned requirement-gathering and technical specification for client engagements, working directly with stakeholders to convert ambiguous asks into scoped, delivery-ready plans across all 4 projects.
- Partnered with product managers and UI/UX designers to translate business requirements into technical specifications, ensuring alignment with project goals and timelines.
- Mentored junior engineers and interns on technical fundamentals and delivery practices.

Software Engineer

Saigma Strategic Systems

May 2021 – Aug 2022

- Designed and built production MERN-stack applications from schema to deployment, establishing architecture patterns later reused across multiple projects.
- Designed database schemas and project architecture, ensuring scalability and efficiency, and oversaw design and implementation end-to-end.
- Received mentorship from senior engineers while building foundational skills in software development principles.

PROJECTS

HealthCare Project

An all-in-one, HIPAA-compliant, FDA-registered healthcare system combining remote data monitoring and telemedicine features to help doctors improve patient outcomes and increase provider and patient engagement.

Technology Stack: *Microservice, Nest.js, SNS & SQS as message broker, GRPC, MongoDB, Next.js, Tailwind, Stripe, Twilio, Chime*

Toothy.ai

An AI-powered platform for dental insurance operations, using RPA to automate insurance verification and revenue-cycle workflows so practices collect faster with fewer denials. Built on HIPAA-first workflows with role-based access controls, full audit trails, and exception tracking for compliance.

Technology Stack: *Python (RPA & data processing), NestJS, Supabase*

QuickSteps

A cutting-edge web-based accounting and invoicing platform built for small and medium-sized businesses (SMBs), engineered to simplify and streamline a comprehensive spectrum of financial tasks.

Technology Stack: *Nest.js, PostgreSQL, Sequelize, Next.js, Tailwind, MUI, Stripe, SES, SNS*

RevConductor

The Industry Cloud for High Tech Manufacturers, revolutionizing collaboration across the end-to-end supply chain of high-tech manufacturers to bring better products to market, faster.

Technology Stack: *GraphQL, PostgreSQL, Microservice Architecture*

Temple Day Spa

A client management and appointment system for spas, offering personalized service selection including room and therapist preferences, with effortless scheduling and detail management for clients.

Technology Stack: *Express.js, MongoDB, ReactJS, MUI, Redux-Toolkit, RTK-Query*

Lahebo

Risk and compliance simplified. Automates tracking of legislative changes across Australian states and how they apply to business processes — a central GRC (governance, risk, and compliance) platform to create, edit, and monitor risks and actions.

Technology Stack: *Nest.js, PostgreSQL, TypeORM*

And many more...

ACADEMIC HISTORY

BS Software Engineering

Sep 2018 – Oct 2022

- CGPA: 3.92
- Activities and societies: Participated in Sport Competition (Badminton) | Participated in Speed Programming | Actively involved in University's Seminars, Workshops, and Events.

TECHNICAL SKILLS

- | | | | | |
|--------------|--------------|-------------|----------------|--------------------|
| • JavaScript | • PostgreSQL | • React.js | • Stripe | • AWS EC2 |
| • TypeScript | • MySQL | • Next.js | • Twilio | • AWS SNS, SQS |
| • Node.js | • MongoDB | • Redux | • Socket.io | • AWS SES |
| • Express.js | • Supabase | • RTK Query | • SendGrid | • HL7 FHIR |
| • Nest.js | • Mongoose | • GraphQL | • Git, GitHub | • AWS Event Bridge |
| • Python | • TypeORM | | • Docker CI/CD | • AWS Chime |
| • Flask | • Sequelize | | | |

SOFT SKILLS

- | | |
|---------------------|----------------------------------|
| • Decision Making | • Leadership |
| • Positivity | • Clarifying Client Requirements |
| • Team Work | • Problem Solving |
| • Critical Thinking | |
